This line chart displays monthly sales trends from April 2020 to March 2025. The "Amount" field is aggregated by month and shown in a continuous timeline
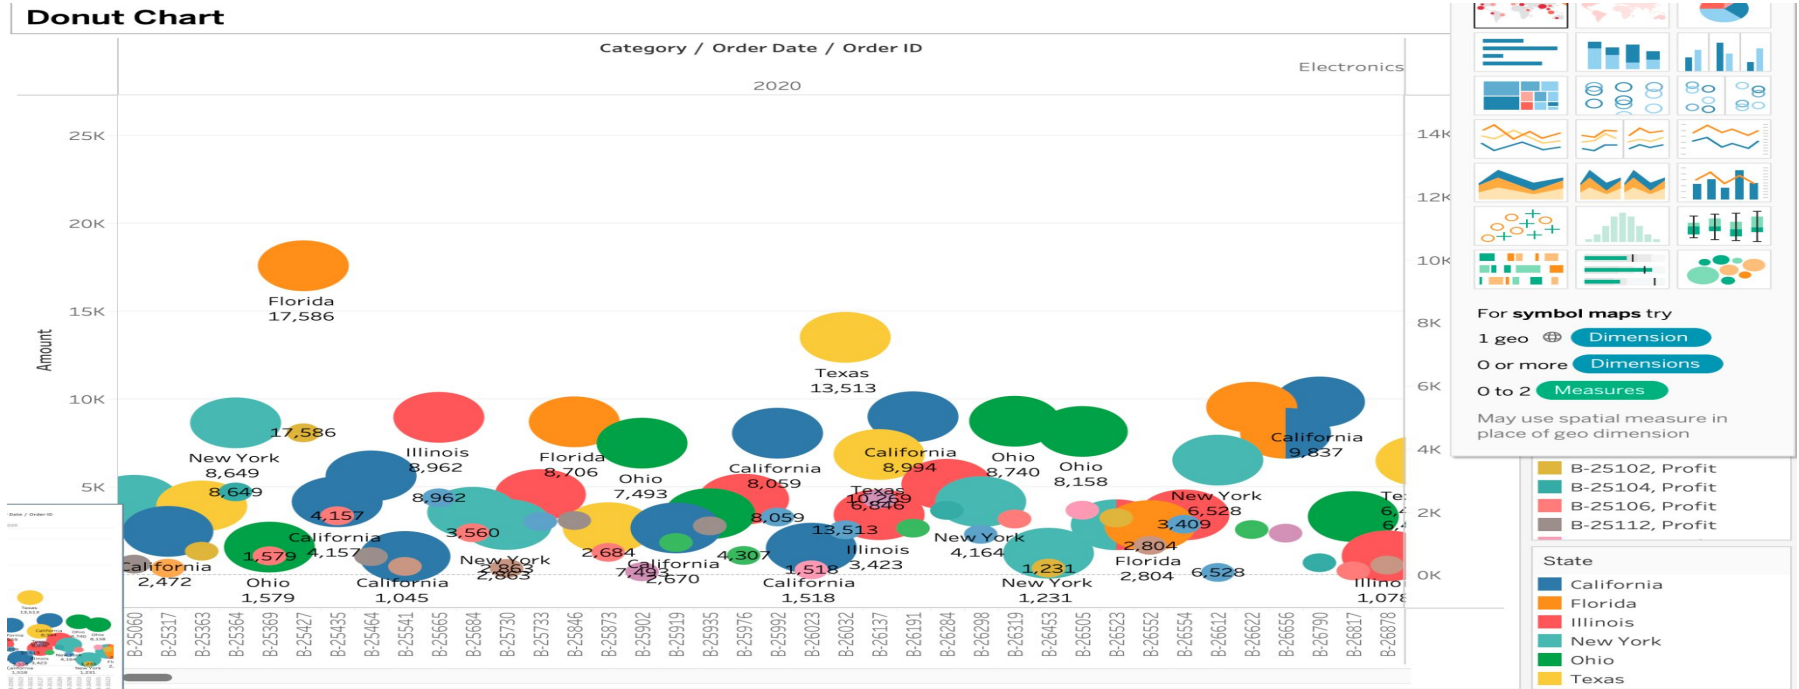

This bar chart compares the total sales amount across major U.S. cities. Colors indicate performance intensity (darker = higher sales).

City by Amount

City

A colorful donut chart shows sales by category and state using dual-axis layering. Each bubble represents a state's sales volume, categorized by product.

This scatter plot displays the distribution of sales quantity across different states. Each dot represents an individual data point related to quantity sold in a specific state.

This dashboard shows recent sales trends by month, city, state, and category. New York leads in both amount and quantity. Sales vary by month, with key contributions from electronics and furniture.
